Presenting the **Lydney** Location

Lydney – the town for the future

Building foundations

4 Future developments

3 Community support

2 Ease of access

1 Population - growing

Lydney – profile

- ▶ National rail station
- ▶ 24/7 manufacturing
- ▶ Average Deprivation
- ▶ Large dial a ride fleet
- ▶ The largest population
- ▶ Best all weather access

- ▶ Progressive Council Neighbourhood Development Plan
- ▶ Vibrant community
- ▶ Scenic location – harbourside – town parks
- ▶ Growing population- Bridge Tolls removed

- ▶ 7.20 “Lydney is the most accessible and has the most potential for **change** of the four towns in the District. Its role serving the south forest will remain but from an increased service base with improved facilities and greater attractiveness for new investment.”
- ▶ 7.21 “The scale of the expansion that is planned in Lydney approximately equals that in the other three towns taken together This is a reflection of the scale of opportunities and also the level of constraints at the other three locations.”
- ▶ 7.22 “The Core Strategy depends on Lydney as the town with the **greatest opportunity for change** and the scale of new development will reflect this. It is able to offer a range of services including **access to the rail network.**”

- ▶ **7.20** “Lydney is the most accessible and has the most potential for **change** of the four towns in the District. Its role serving the south forest will remain but from an increased service base with improved facilities and greater attractiveness for new investment.”

Doctor Helen Tucker

Chairman of Community hospitals association

From our experience, it can be difficult to establish a new Community Hospital in a town that has never had one before.

Some of the new Community hospitals in new areas do not have the benefit of a ‘Friends of the Hospital’ group, and there are few volunteers. There have also been difficulties in engaging with local GPs, who have never had a community hospital as part of their practice service or workload before.

So there are significant benefits in providing continuity and retaining the community hospital within the town

F L H riends ydney ospital

90 YEARS

The community has been supporting Lydney Hospital

Who are the Friends?

Examples of the items purchased over the past 3 years

Trauma Trolley **£4,216**

Motomed **£4,880**

X-ray **£120,000**

Annual income

Assets of approx. £1.5m

Full details are available on the Charity Commission website

4 Future developments

Lydney first

**First for
population**

**First for
access**

**First for
community support**

Doctor's opinion

I believe a Community Hospital is part of the Community. It needs and survives only with long term, organised, community support. Lydney has a track record of substantial, long term support through the Friends, the Town and the Practices – it makes sense to site it in Lydney.

A Medical view

Good access for:

- ▶ Emergency services
- ▶ Acute care
- ▶ Staff recruitment
- ▶ Staff retention
- ▶ Consultants for Outpatients
- ▶ All weather and rail
- ▶ Community and medical support

Lydney's solid foundations will build a strong new forest community hospital

- ▶ **co-location, room for expansion, large sites with car parking, Glos 2050 -Lydney Sharpness M5 link 6,000 houses?**
- ▶ **FoLH unique support and legacy**
- ▶ **For patients, staff, emergency services, direct rail to South Wales and Gloucester, A48 trunk road, all weather access**
- ▶ **Largest population, highest growth, least patients miles**

Summary

FoDDC Core Strategy states Lydney is :-

- “....Key to the development of the Forest District..”
- “....Most accessible town..”
- “....Planned expansion equals other towns together..”

New Forest Hospital is for the Future

Lydney location with Road and Rail will enable

- least patient miles
- Reliable access for patients, staff and blue light services
- opportunity to co-locate and expand services

Existing Tradition of Support from well established “Friends”

Remember

THE location of a
new community hospital
for the Forest of Dean...

COLEFORD

Figure 1 COLEFORD GROWTH AND POPULATION

COLEFORD has completed and submitted our Neighbourhood Development Plan (NDP): under examination as at June 2018
Key points in terms of growth

Growth allocated for 1049 households
 (not 650 as in FoDDC Core Strategy)

Agreed with Coleford employment sites as in FoDDC Allocations Plan

Included policies for growth, improved infrastructure

Figure 2 COLEFORD NDP IN TERMS OF HEALTH AND WELLBEING

www.colefordtownplan.com

COLEFORD is a key priority in Gloucestershire NHS sustainability and transformation plan

COLEFORD has above the England average in all 11 health categories of deprivation, particularly

Caring, especially unpaid care

Work limiting and long term illness

Obesity

The consultation responses to NDP in both 2016 and 2017 focused on being a green place and improved health infrastructure

Hence the following policies are relevant

Policy CC3 Local Green Spaces

Policy CNE1 Protecting and Enhancing Local Landscape Character

Policy CNE2 Green Ring

Policy CNE3 Green Infrastructure

and especially

Policy CITPA3 Local infrastructure for health and wellbeing

Figure 3 POLICY CITPA3 LOCAL INFRASTRUCTURE FOR HEALTH AND WELLBEING

Starts with the location criteria for the already agreed larger or replacement health centre:

increased GP premises, possibly with capacity for minor surgery and more out-patient services within a five year projection (2017).

Then continues

Should the agreed new Forest of Dean Hospital be located in Coleford, then the NDP would support a suitable site in Coleford which follows these criteria:

- One site covering up to 2 hectares in size
- Accessible: for patient & staff car parking, public transport and appropriate disability access
- Within the development boundary
- With a possibility of linking the primary care centre with such potential hospital site in Coleford

Figure 4
A GREEN PLACE
FOR A HOSPITAL

COLEFORD has liased with the NHS and identified suitable sites in areas where the landscape will provide pleasant surrounds to the new hospital.

- Existing Urban land 
- Local Green Space and Green Ring 
- Coleford Parish and NDP boundary 

Figure 5
DIRECT
SCHEDULED BUS
FREQUENCIES

More people can more frequently get to **COLEFORD** by direct public transport links.

COMMUNITY SUPPORT:

■ During the initial consultation on the proposed new community hospital for the Forest of Dean **COLEFORD** area responders (**GL16**) was the only one of the three locations to support the proposal by a majority (**54%**).

■ Given that **COLEFORD** is not a current hospital location there are no active groups campaigning against this proposal and a location choice of **COLEFORD** is likely to be met by strong community support as evidenced above.

■ **COLEFORD's** neighbouring parishes either directly support **COLEFORD** as the location for the new community hospital or indirectly support it stating their most important criteria for location as 'well connected by public transport' (*English Bicknor and Lydbrook*).

■ During the last round of Neighbourhood Development Plan consultation (*Regulation 16*) there were no representations against **CITPA3** which includes the statement of support for the new community hospital and the criteria for selecting a suitable site.

IN SUMMARY:

■ In the first round of consultation **54%** of the **293** responders' from **GL16** supported a new single community hospital for the Forest of Dean (*Cinderford and Lydney were both 47%*)

■ **COLEFORD** is the home of the Great Oaks Hospice that serves the Forest of Dean

■ **COLEFORD's** population is set to grow by approximately **23%** (2014-2026 estimate) with the emerging Allocations Plan which is supported by the emerging Neighbourhood Development Plan.

■ **COLEFORD** is better served by direct public transport services as a hospital location than the other two Forest towns.

■ **COLEFORD** has an emerging Neighbourhood Development Plan (currently at examination stage) that supports the town as a location for the new community hospital.

■ There are identified sites in the **COLEFORD** area that are available and have the potential to provide pleasant surroundings for a new hospital.

Cllrs. Marilyn Cox
and Nick Penny,
Coleford Town Council

Cinderford

Heart of the Forest

Why the new community hospital
should be located in Cinderford

Chris Witham - Chair of Cinderford Town Council
www.cinderfordtowncouncil.gov.uk

Why we're here

- “The NHS is accountable to the public, communities and patients that it serves” - NHS Principle #7
- Full support of The League Of Friends Of The Dilke Hospital

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

What we'll cover

- 5 important factors
- Why these factors matter
- Why Cinderford is the best choice for these factors

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

1. Ease of Access

“The NHS provides a comprehensive service available to all” - NHS Principle #1

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

1. Ease of Access

Why does this matter?

- The ability to transfer patients to and from Gloucestershire Hospitals NHS Foundation Trust
- Ability to maintain a service in the event of primary route closure (A40 or A48)
- Easily accessible to patients, visitors and staff

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

1. Ease of Access

Heart of the Forest
Supported by The League Of Friends Of The Dilke Hospital
www.cinderfordtowncouncil.gov.uk

1. Ease of Access

Heart of the Forest
Supported by The League Of Friends Of The Dilke Hospital
www.cinderfordtowncouncil.gov.uk

1. Ease of Access

Heart of the Forest
Supported by The League Of Friends Of The Dilke Hospital
www.cinderfordtowncouncil.gov.uk

1. Ease of Access

Why is Cinderford best placed?

- Short journey time by either the A40 or A48 ~25 minutes
- Coleford and Lydney are only served by one main route and have diversion routes around 44 minutes

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

2. Available to All

“Access to NHS services is based on clinical need, not an individual's ability to pay” - NHS Principle #2

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

2. Available to All

Why does this matter?

- NHS services are free of charge
- People should not be excluded from accessing healthcare due to financial restrictions

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

2. Available to All

2. Available to All

2. Available to All

Why is Cinderford best placed?

- Residents in the south of the district are more likely to have the means to travel to Cinderford
- Cinderford residents may struggle more to travel further afield

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

2. Available to All

Why is Cinderford best placed?

- Highest areas of deprivation centre around Cinderford
- Cinderford is easily accessed from Newent and the Northern areas of the Forest of Dean District

Heart of the Forest
Supported by The League Of Friends Of T

3. Multi Agency Support

“The NHS works across organisational boundaries and in partnership with other organisations in the interest of patients, local communities and the wider population.”
- NHS Principle #5

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

3. Multi Agency Support

Why does it matter?

- “The NHS is committed to working jointly with other local authority services, other public sector organisations and a wide range of private and voluntary sector organisations to provide and deliver improvements in health and wellbeing.” - NHS Constitution
- Wellbeing is more than just ‘healthcare’ - social care and a holistic approach is required

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

3. Multi Agency Support

Why is Cinderford best placed?

- Only town council to sign up to Forest of Dean Dementia Action Alliance
- Developed disabled toilet facilities and aim to open a Changing Places Toilet in 2018
- Cinderford Health & Wellbeing project
- Forest Voluntary Action Forum - FVAF

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

4. Transport links

“The NHS is committed to providing best value for taxpayers' money and the most effective, fair and sustainable use of finite resources.” - NHS Principle #6

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

4. Transport links

Why does it matter?

- Total cost of providing services
- Patients, visitors and staff need easy access to the new hospital

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

4. Transport links

Current bus routes in the Forest of Dean

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

4. Transport links

Why is Cinderford best placed?

- Natural, existing hub for bus routes throughout the Forest of Dean District
- Northern Quarter development offers a great opportunity to reconsider transport networks and create a stronger hub in Cinderford

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

5. Heritage

“The NHS aspires to put patients at the heart of everything it does” - NHS Principle #4

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

5. Heritage

Why does it matter?

- “NHS services must reflect, and should be coordinated around and tailored to, the needs and preferences of patients, their families and their carers.” - NHS Constitution
- Holistic approach to wellbeing
- Birth rites
- End of life care - dying well

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

www.cinderfordtowncouncil.gov.uk

5. Heritage

Why is Cinderford best placed?

- 95 years at the Dilke hospital site
- “Like being at home even when you’re not”
- Heart of the Forest

Heart of the Forest

Supported by The League Of Friends Of The Dilke Hospital

Care Services
NHS Trust

Inpatient Beds

- **Approximately 80% of our admissions come from neighbouring acute hospitals with 20% being admitted directly from the community**
- **Typically on any day 19 or 20 Forest of Dean residents are in a community hospital bed in Gloucestershire (there are 47 beds in Dilke and Lydney)**
- **Of the patients who live in the Forest of Dean, patients in central Forest predominantly go to Dilke, and patients in south Forest predominantly go to Lydney**
- **Patients are admitted for:**
 - Sub acute care
 - Rehabilitation
 - End of life care

Understanding You

Inpatient Beds – Age profile

Understanding You

Urgent Care

- **Minor Injury and Illness Units**
- **Emergency Care Practitioner led - (nurses and paramedics with advanced skills)**
- **Patients can be seen and treated for:**
 - Sprains
 - Simple fractures
 - Simple wounds that may need stitching
 - Minor burns
 - Minor illness - earache, sore throat etc
 - Skin problems – rashes, bites, stings
 - Eye conditions including foreign bodies

Urgent Care – age profile

MiiU Attendances by Patient Age Band

The future....

- **There is a clear commitment that services currently provided in the community hospitals in the Forest of Dean will continue to be provided in the new hospital (Inpatient beds, Urgent Care and Ambulatory Care)**
- **The hospital will be flexible to meet the changing needs of the local population and changes in the way healthcare services are provided. For example, one of the biggest areas of day case activity for Forest residents is endoscopy, which is not currently provided in the Forest; the new hospital could provide an endoscopy suite**
- **We will explore opportunities to include flexible spaces for community teams to be able to work together in one base, and potentially have a community hub available for use by Forest residents/voluntary groups**

Thank You

Any Questions?

Forest of Dean Citizens Jury

Who are the patients?

31st July 2018

Dr Rebecca Maclean, Consultant in Public Health

Where do people live?

- Population density is highest around the towns

Who lives where?

0-4 year olds

Wards around the towns of Cinderford, Coleford and Lydney as well as the southern ward of the Forest of Dean have:

- higher numbers of children aged 0-4 years
- higher proportion of 0-4 year olds than the district average

65 years and over

- The wards with higher numbers of people aged 65 years and over are distributed across the Forest of Dean.
- Wards with a higher proportion of people aged 65 years and over are also distributed across the Forest of Dean.

85 years and older

- The wards with higher numbers of people aged 85 years and over are distributed across the Forest of Dean, with wards around the towns.
- Wards with a higher proportion of people aged 85 years and over are also distributed across the Forest of Dean.

Deprivation

The Index of Multiple Deprivation combines seven domains :

- Income Deprivation
- Employment Deprivation
- Education, Skills and Training Deprivation
- Health Deprivation and Disability
- Crime
- Barriers to Housing and Services
- Living Environment Deprivation (9.3%)

Deprivation – health and disability

This takes into account:

- Years of potential life lost
- Comparative illness and disability ratio
- Acute morbidity
- Mood and anxiety

Population segmentation

Wellbeing Acorn is used in the following slides

- Wellbeing Acorn is a tool that combines geography with information such as age, gender, interests, spending habits, and so on that enables the grouping of households with similar characteristics
- It provides an indication of the *likely* health and wellbeing of the population based on modelled data.

Group 1 are likely to have

- higher levels of illness and potentially make greater use of services due to greater need
- some of the highest levels of smoking
- some of the oldest people in the most deprived neighbourhoods
- Issues around isolation and mental wellbeing

Group 2 are likely to have:

- multiple unhealthy behaviours which could put their health at risk in the future.
- the highest rates of smoking in the country along with some alcohol concerns.

Thank you
